

Announcing GreenMCMeds as Crossroads COVID-19 Testing Partner

We are committed to making Crossroads as safe an event as we possibly can for all staff, participants and attendees. To that end, we are requiring **each person on a roster** at Crossroads **to show proof**, at the time they first enter the playing facility, **of having had a negative COVID-19 test not more than 72 hours before the start of the tournament or of having completed a course of vaccination at least 10 days before the start.** **This requirement is non-negotiable.**

We understand that the testing requirement could be cumbersome and perhaps expensive. To help you access testing and make it as convenient as possible, we are partnering with GreenMCMeds as our COVID Clinical Liaison. They are able to provide solutions for clubs and all their teams, whether attending Crossroads or not, to practice and play safely and to access testing easily. The GreenMCMeds testing program can provide guidance and support regarding participation and attendance for practices, games, tournaments, and other events at **no cost to the club, the team or the individuals** that choose to use these services. **Using this service** at your club is **purely optional**; having a negative test or completed vaccination before coming to Crossroads is not.

The GreenMCMeds program will conduct weekly PCR testing for all clubs and teams that choose to participate in the program. The testing allows clubs to use this program for players and staff of the teams participating at Crossroads, as well as for other teams and staff from the club not participating in Crossroads. They will receive a PCR weekly test for the time leading up to Crossroads. This test uses a throat swab sample; it is administered at **no cost to the club, teams or the individuals** using the service by a trained health care professional. Tests can be administered at the club or team's location (subject to a required minimum number of participants and a sufficient length of time for each testing session). **If you are interested is using GreenMCMeds service for Crossroads, please contact them ASAP.** It is an optional service.

Participating clubs or teams will receive test results for each person participating within 36 hours. The **results are completely confidential**. All persons with a negative test result can continue to practice or play while following the standard local precautions regarding curtailing the spread of COVID-19. If the test result is positive, GreenMCMeds can then provide the appropriate protocol and guidance, following the CDC's quarantine procedures, to the club. Immediate retesting would commence 2-3 days after the initial test date for the team and staff that had come in contact with the positive individual. Individuals who would like a copy of their results may contact the club's administration for it.

FRVBC Foundation and Crossroads are happy to participate, with GreenMCMeds' support, in efforts to curtail community spread of the virus and create a healthy

environment for everyone to keep playing and enjoying the sport of volleyball that we all love while being as safe from COVID-19 as we can be.

A club or team that chooses to participate in GreenMCMeds' program can **contact them at 312-838-2400 or COVID@GreenMCM.com**. Please mention that you are participating in the Crossroads tournament.

An application form is attached, along with a flyer and additional information to distribute to team members. To be the most effective, you need to start your coordination with GreenMCMeds ASAP.

Please let Crossroads know if you have any questions about the mandatory test for Crossroads; please contact GreenMCMeds if you have any questions about their testing program and how to enroll your team or club in it.
